PIGMENT PREPARATIONS FOR SOLVENT-BASED PAINTS HOSTATINT™ A 100

The Hostatint A 100 pigment preparations are based on an aldehyde carrier resin which was developed especially for industrial paint applications. The preparations are produced to narrow tolerances of shade and color strength allowing highly consistent paint production with both manual and automatic dispensing. The solvent and additives were chosen to avoid hazardous labelling or special storage conditions associated with flammability. All Hostatint A 100 show good compatibility and can be added to many types of solvent-based paint systems.

Hostatint A 100-ST are based on »super-transparent«, halogen-free pigments and are designed for transparent or metallic effect shades.
