SUSTAINABLE AND BIODEGRADABLE COLORANTS COSMENYL® S 100

We at Heubach are specialized in the coloring of personal care as well as home and fabric care products such as shower gels, bar soaps, shampoos, body paints, detergents and softeners.

Limiting the consequences of climate change and successfully steering our societies and lifestyles towards greater mutual respect and cooperation are among the biggest challenges of our time. Therefore, sustainability is a core value of the new Heubach Group and the driver for our portfolio development.

We have developed a new range of sustainable pigment preparations (aqueous dispersions), Cosmenyl® S 100, based on inert inorganic pigments formulated with readily biodegradable additives. Being inert, inorganic pigments have no negative impact on nature, therefore, they are suitable for a sustainable solution. We offer a new range of various earthy, warm shades recommended for home care (laundry detergents), as well as for personal care (soaps, toothpaste) applications.

ADVANTAGES AT A GLANCE

- The pigments are inert, and all other ingredients are readily biodegradable.
- Included in at least one of the authorized use lists for cosmetic colorants for the EU, USA or Japan.
- Optimized preservative system complying with EU regulations.
- Products meeting strict purity requirements (heavy metals, PAA, PCB) and microbiological specifications.
- Readily pumpable and flowable aqueous dispersion
- Global and regional product safety support.

APPLICATION AREAS

Selected for the coloration of toiletries, cosmetics, as well as home care products in liquid, as paste or powder, e.g.

- Soaps
- Toothpaste
- Shampoos
- Detergents
- Speckles for powders detergent
- Cleaning agents
